

XM Radio has done what local radio stations haven't. They've provided music the listener wants to hear. So, why should they be penalized by not being allowed to broadcast weather and traffic. This seems grossly un-American to me. We pride ourselves on our innovation and resourcefulness as a nation. We should NOT allow the NAB to stifle that. XM radio is a new idea who's time has come. Let's let the free market decide whether or not it's good.
